Sewer Line Replacement on 11th Street Update:

Eleventh street was collapsing, had sink holes and cracked asphalt. 2 service lines coming from the houses feeding to the main line had broken loose completely. Started repair on that area and finished up on Tuesday evening 12 am. Thursday morning started on 2nd sinkhole near Kurt Dennis's house. Was only one service line going into the main line. When digging out first section discovered a service line made of steel pipe going into terracotta pipe. Around where service line goes into main pipe they just poured concrete into hole instead of putting a boot to repair properly. In the 2nd sinkhole area 2 things were found; Ten years ago they ran a line to flush out pipes, line got stuck in main sewage line and just cut and tied 150' of line to steps under manhole on Market Street. After 8-10 years line just finally clogged up. Were able to pull out old line with a bobcat but had left 38' of damaged, cracked pipe that had to be replaced. Workers were out until 11 pm 2 nights and finally finished up on Saturday night at 2 or 3 am. Cost not finalized yet. Will be in \$20,000 range under street repair work. City Manager complimented and recommended to bring public works men into next town council meeting to give them a recognition and \$200.00 bonus gift cards.

In a motion (Tasker, Trotter passed) to invite Public Works to council meeting for recognition and gift card presentation.
